

Avanish Tiwari

Full Stack Developer | AI Application Developer

9506440848 ◇ avanisht.at.at@gmail.com ◇ Chandauli, Uttar Pradesh, India ◇ [LinkedIn](#) ◇ [GitHub](#) ◇ [Portfolio](#)

SUMMARY

Full Stack Developer with hands-on experience building AI-powered web applications using React, Next.js, Node.js, Express.js, MongoDB, and Python. Developed production-ready MERN applications, Retrieval-Augmented Generation (RAG) systems, and AI travel planning solutions with secure authentication, vector search, and cloud deployment. Passionate about solving real-world problems through scalable software, AI integration, and continuous learning.

SKILLS

Frontend React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Flexbox, Responsive Design, React Context API, React Router, Vite, React Markdown, React Syntax Highlighter
Backend Node.js, Express.js, REST APIs, JWT Authentication, Bcrypt, Multer, Google Gemini API, Groq API, Axios, Mongoose
Database MongoDB, PostgreSQL, SQLite, ChromaDB
AI Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Embeddings, Semantic Search
Languages JavaScript, Python, SQL
Concepts Object-Oriented Programming (OOP), Data Structures & Algorithms, Problem Solving
Tools & Deployment Git, GitHub, Redux Toolkit, Postman, AWS EC2, Nginx, PM2, Render, Vercel, Netlify, Streamlit, Razorpay Payment Gateway, Recharts, dotenv

PROJECTS

VoyageMind AI – AI Travel Planner [Link](#)

- Built an AI-powered travel planning platform using Next.js, Express.js, MongoDB, and Google Gemini that generates personalized day-wise itineraries, hotel recommendations, estimated budgets, destination-specific safety & caution tips, and AI-assisted itinerary regeneration.
- Implemented secure JWT authentication, user-specific trip management, AI-powered itinerary regeneration, dashboard analytics, and robust backend validation using Express.js and MongoDB.
- Designed a scalable REST API architecture with structured JSON generation, retry handling, and complete multi-user data isolation for production-ready AI workflows.

NxtTrendz – Full Stack E-Commerce Platform [Link](#)

- Architected a production-ready MERN e-commerce platform using React.js, Node.js, Express.js, and MongoDB featuring JWT authentication, Razorpay payment integration, and Prime subscription management.
- Developed a backend proxy layer with token caching, persistent MongoDB cart, optimistic UI updates, debounced cart synchronization, and idempotent order creation to prevent duplicate payments.
- Deployed the application on AWS EC2 using Nginx reverse proxy, PM2 process management, and MongoDB Atlas for cloud-hosted persistent storage.

ResolveAI – AI Customer Support Platform [Link](#)

- Developed a Retrieval-Augmented Generation (RAG) customer support assistant using Python, Streamlit, Google Gemini, and ChromaDB to answer support queries from PDF, Markdown, and text-based knowledge sources.
- Implemented semantic search with vector embeddings, customer persona classification, confidence-based escalation, and adaptive AI responses grounded in retrieved documentation.
- Implemented reusable retry handling with exponential backoff for temporary AI service failures and automated document ingestion for scalable knowledge-base indexing.

EXPERIENCE

Sanghmitra in Operations

Vaya Finserv Pvt. Ltd.

Jun '21 — Aug '22

Gazipur, Uttar Pradesh, India

- Led microfinance operations for 200+ rural families by conducting credit assessments and risk analysis, maintaining over 95% loan recovery while promoting financial inclusion.

EDUCATION

Industry Ready Certification in Full-Stack Development, NxtWave Disruptive Technologies

Jun '25 — Present

Bachelor of Commerce (B.Com) in Commerce, Shahid Captain Vijay Pratap Singh Mahavidyalaya

Jun '17 — Jul '20

Varanasi, India

ACHIEVEMENTS & CERTIFICATIONS

Completed 180+ days of coding challenges demonstrating consistent problem-solving and software development practice.
